Garrett

FUEL INJECTION & TURBOCHARGER SPECIALISTS

- Injector pumps & Injectors
- Turbochargers
- Vehicle Diagnostics
- Common rail diagnostics & repair
- Petrol injector servicing
- Power upgrades

PROFILE

At Diesel Pumps

We provide the highest quality service, specialising in fuel injection, turbocharger equipment and power upgrades.

With over 100 years of combined experience, no project is too big or too small for our workshop team based here in Christchurch.

We have 4 bays available for vehicle servicing, from front to back, enabling us to provide a fast and efficient service.

SERVICES

Pumps:

The injector pump is the heart of diesel engine. Diesel Pumps can ensure yours is pumping as it should be to deliver the right amount of fuel to the combustion chamber, ensuring maximum performance whilst minimising fuel burn & oil consumption.

Scott and the team at Diesel Pumps are fuel injection and turbo charger specialists. With their specialist test benches, 100 years combined experience and reputation for quality service, Diesel Pumps are the trusted choice for injector pump service & repair.

Injectors:

Whether the injectors in your vehicle are manufactured by Bosch, Zexel, Denso, Delphi, Siemens or Stanadyne; Diesel Pumps can help. They are authorised service agents and can get your engine running again smoothly to minimise fuel burn & oil consumption.

Scott and the team at Diesel Pumps are fuel injection and turbo charger specialists. They have specialised injector machines compatible with a wide range of injectors to ensure a fast & efficient turnaround to keep your vehicle operating.

When your injectors have reached the end of their lifetime, Diesel Pumps can supply new injectors direct from the manufacturer, and carry a range of rebuilt injectors. Diesel Pumps also service petrol engine injectors; able to clean, and check flows & patterns

Turbocharger:

Whether your turbocharger is manufactured by Garrett, IHI, Mitisubishi, Holset or BorgWarner; Diesel Pumps have the knowledge and experience to ensure your vehicle is getting the power it should be from your turbo. Scott and the team at Diesel Pumps are fuel injection and turbo charger specialists. Their Gieser balancer, kiwi ingenuity and reputation for fast & efficient service means they can do what it takes to maximise the lifetime of your turbocharger.

When your turbos has reached the end of their lifetime, Diesel Pumps can supply replacements direct from the manufacturer, and carry a range of upgrade kits on the shelf. Oil dysfunction is the prime cause of turbocharger failure, regular servicing can identify this and minimise future repair costs. Whether you need to service your existing turbo or want to look at power upgrade options, Diesel Pumps have the answer.

DIESEL PUMPS LTD

Petrol Injector Servicing:

Our New Age programmable machine allows us to clean, check flows and patterns of EFI injectors. This is often an overlooked, but crucial component, when servicing petrol engines.

Power Upgrades:

We all want more power and with manufactures often conservative in their settings it can be practical to up power and torque within safe limits. Be it a simple boost setting, fuel setting, timing setting or a full blown turbo and intercooler upgrade. Diesel Pumps have many options available.

Common Rail Diagnostic and Repair

Diesel Pumps can expertly repair or replace your injectors, pumps or turbochargers but prevention is better than cure. Regular servicing and preventative maintenance ensure longer life and vehicle efficiency.

Scott and the team at Diesel Pumps can expertly diagnose engine and fuel system faults; with four different scanners to check codes and live data.

DIESEL PUMPS LTD

**Specialising in high quality
fuel injection and turbocharger
service since 1961**

Sabre CRi Expert

- n Pressure to 2700 bar
- n High low for commercial CR Injectors
